

LIST OF CURRENT CLAIMS

1. (Currently Amended) A standoff connector, comprising:
a cylindrical body having a diameter;
a base disposed at a lower end of the body, the base having a ~~section less than that of the body~~ diametric dimension greater than the diameter of said body;
a ~~rotatable~~ handle disposed at a top end of the body;
a ~~rotatable~~ neck ~~interconnected~~ formed between the handle and the body, the neck having a ~~rotation radius~~ diameter smaller than that a width of the handle; and
at least one flexible wing disposed on a surface of the body, the wing being spaced from the base by a distance;
wherein at least said body, neck, and handle are formed in a single unitary piece.
2. (Original) The standoff connector of claim 1, further comprising a tab disposed at a lower end of the wing spaced from the base.
3. (Original) The standoff connector of claim 2, wherein the tab has a thickness no more than a maximum thickness of the wing.
4. (Original) The standoff connector of claim 2, wherein the handle comprises two projections at opposite sides thereof.
